# Why Promotional Products?

Promotional products, giveaways, freebies, and branded merchandise are used by virtually every major brand in the world. Why? Logoed products like pens, t-shirts, grocery bags, thumb drives, water bottles, etc. are a high-impact, cost-effective advertising medium that beats out just about every other type of marketing, helping promote everything from new prospects, academy awards and even graduations. Look around! Bet you spot a ton of practical, useful promos pretty much everywhere. For instance, if you're targeting university students, promotional products such as branded notebooks, lanyards or water bottles with your logo on them can be effective, as students commonly use these items.

## **Below are a few more reasons to use promotional products.**

- Promotional products are effective tools for increasing brand exposure. Studies have shown that customers are more likely to remember a company that provides them with a tangible item they can use.
- Brand recognition is increased with promotional products. Customers who receive a promotional product repeatedly see the logo or message, leading to increased brand recall.
- Printed materials or digital ads may only be seen for a few seconds or minutes, while a promotional product, such as a customized tote bag or water bottle, can be used and seen on a daily basis, promoting your brand and message for a long time.
- Promotional products come in a wide range of prices and options, allowing businesses of all sizes to invest in a marketing strategy that works for them.
- Promotional products aren't just great marketing tools, they're also great relationship builders. Providing gifts or giveaways to clients, partners, and employees can significantly strengthen relationships and demonstrate appreciation for their support.
